Subject: Request for Student Interviews on Daily Network/System Administration Practices

Dear Sir/Madam

On behalf of Adventist University of Central Africa (**AUCA**), I am writing to request the opportunity for our student **Moise NDARUHUTSE, Student ID: 28340**, to conduct an interview with one or more of your esteemed Network/System Administrators. Our objective is to gain insight into the daily activities and practices that underpin successful network and system management in a real-world environment.

This initiative is part of our academic project designed to bridge the gap between theoretical learning and practical industry experience. By interacting directly with professionals like those at your institution, our students will better understand the features, implementation strategies, and benefits associated with effective system management. Your willingness to share insights and best practices will be invaluable in equipping these future tech engineers with the practical skills they need to succeed in a dynamic industry.

We kindly ask that you consider designating a Network/System Administrator who can engage with our student (either through an in-person meeting or a virtual session) at a time convenient for your team. Furthermore, we would appreciate receiving an official confirmation from your end, either in the form of a signed letter or an email from a company email address, verifying that the administrator has reviewed and agrees to support our research initiative.

We are grateful for your invaluable contribution to the development of the next generation of well-equipped technology professionals. Your support not only enriches our students' educational experience but also strengthens the bridge between academia and industry.

Thank you very much for considering our request. Please do not hesitate to contact me at joshua.kayonga@auca.ac.rw or [+250788243482](tel:+250788243482) should you require any additional information.

Sincerely,

A handwritten signature in blue ink, appearing to read "Joshua K. Iradukunda", is written over the printed name and title.

Joshua K. IRADUKUNDA

IT Lecturer at Adventist University of Central Africa

IT/Networking Department.
